Legal disclaimer

General information only. Not an offer to sell or solicitation to buy securities, virtual assets, or any investment product. Not investment, tax, or legal advice. Forward-looking statements are subject to risk; protocol economics and token features may change or never launch. Terms of any transaction are governed only by signed documents.

一般性信息；不构成在任何司法辖区出售或要约购买证券、虚拟资产或投资产品的要约或诱引，亦不构成投资、税务或法律建议。前瞻性表述受风险影响；协议参数与代币安排可能变更或不再推出。交易条款仅以双方签署文本为准。

Abstract

TravelTrust decomposes travel trust into **Marketplace, on-chain Escrow, Dispute, Reputation, Community**, and **protocol Governance**. An **optional TTG** is for **governance and ecosystem budgeting**—not default payment for travel at MVP stage; settlement uses **allowlisted stable assets**. Capabilities and contract boundaries **mature with each public release; final completeness and naming follow published contracts**.

Reading path

1. First touch: in-pack 01 One Pager PDF
 2. Protocol/custody emphasis: in-pack 02 Executive Summary PDF
 3. **This litepaper**
 4. Full protocol + token framing: in-pack 06 Whitepaper PDF
 5. Chinese: in-pack 05 Litepaper PDF
-

01 Problem

Trust and settlement between guides/providers and travelers are costly: asymmetry, weak verifiability, opaque disputes, non-portable reputation. **Escrow, auditable state transitions, and structured disputes** reduce counterparty risk; **governance** (with TTG if launched) votes on parameters and budgets **without** mingling **user Escrow principal**.

02 Market opportunity (framework)

No unaudited **TAM** absolutes in public copy. **TAM / SAM / SOM** under **NDA** with **sources and definitions**. Structural beliefs:

- Experiences, cross-border, long-tail SKUs are **fulfillment-sensitive**;
 - Users want **verifiable rules** and **transparent fund paths**;
 - Infrastructure and wallet UX make **on-chain escrow + compliant disclosure** more realistic.
-

03 Protocol subsystems (lite)

Layer	One-liner
Marketplace	Discovery, matching, checkout
Escrow	User principal lock and release
Dispute	Evidence and resolution orchestration
Reputation	Outcomes become visible trust signals
Community	Help, content, supply growth
Governance	Parameters and budgets (TTG , if any)

Text topology: Discover → Match → Escrow → Fulfillment → (optional) Dispute → Settlement → Reputation → Community.

FeeRouter only routes **allocatable order fees**; **never** narratively merge with Escrow principal—**published first-layer percentages and the 100% closure** are **only** in in-pack 06 Whitepaper PDF **Section 06** (this litepaper avoids restating them to prevent duplicate number narratives).

04 Roles (lite)

Traveler funds Escrow; **guide/provider** delivers and proves; **arbitrator/resolver** decides under rules (**fee denominators orthogonal** to first-layer fee split); **community** supports norms; **treasury and governance actors** handle **non-user-principal** flows. Full table: whitepaper **Section 04**.

05 Lifecycle (lite)

Institutions expect **Discover** → **Match** → **Escrow** → **Fulfillment** → **Dispute** → **Settlement** → **Reputation** → **Community**. Binding rules live in **contracts + terms**; public decks stay **qualitative**.

06 TTG (lite conclusions)

Dimension	Statement
For	Governance voting/delegation, budgeting procedure (charter-final)
Not by default	Travel quote/settlement, Escrow co-mingling, equity story, guaranteed yield
Supply	Not fixed here; follow issuer disclosures
Protocol may never issue TTG; no price/utility promise.	

07 Go-to-market (lite)

Supply onboarding and tooling; demand via content and community (**not investment advice**); partners across payments/compliance/channels with disclosure; **regional** token/marketing limits—detail **NDA**. Full: whitepaper **Section 09**.

08 Moats (lite)

Verifiable fulfillment data, reputation, dispute network, integrated stack—mechanistic, not monopolistic.

Institutional Why Win (product → network) with compliance framing: in-pack 06
Whitepaper PDF **Section 10.2**.

09 Risks (categories)

Regulation; contracts/upgrades; adoption/execution; token markets and governance attacks
—**no performance warranty**. Enumeration: in-pack 06 Whitepaper PDF **Section 11**.

10 Roadmap (lite)

Near-term **demonstrable main chain**; fee/governance **staged** under compliance/audit; quarterly **NDA**. Public notes **do not replace** agreements.

Appendix: document split

- **This file**: medium-diligence **short read** (~8–12 pages PDF target); **deep narrative including §10.2 Why Win** lives in **in-pack 06 Whitepaper PDF**—do not duplicate full whitepaper text here.
- **in-pack 06 Whitepaper PDF**: full architecture, FeeRouter, governance, risks, institutional framing.
- **07-Protocol-Tokenomics** (shipped PDF): vectors + **same economic boundary** as **06** (no undisclosed percentages).
